

汉钟绩效考核系统

Hanbell-KPI

Hanbell-KPI系统架构

HANBELL

上海汉钟精机股份有限公司

Hanbell-KPI系统入口

部门指标

产品指标

员工指标

各项指标设定和详细数据

指标维护界面

指标更新排程

报表发送排程

各项指标,数据抽取、计算、归集接口

CRM DB

OA DB

ERP DB

MES DB

云端 DB

其他 DB

Hanbell-KPI

为相同属性的指标定义一个模板 **Indicator Define**

分配

把模板或指标分配到具体考核部门 Indicator, Indicator Detail

归集

把部分指标归集到某个相关指标 **IndicatorSet**

系统逻辑

Hanbell-KPI

Hanbell-KPI系统逻辑

HANBELL 上海汉钟精机股份有限公司

```
public interface Actual {
    public void setBJB(String JNDIName) throws Exception;
    public LinkedHashMap(String, Object) getQueryParams();
    public int getUpdateMonth(int y, int m);
    public int getUpdateYear(int y, int m);
    public BigDecimal getValue(int y, int m, Date d, int type, LinkedHashMap(String, Object> map);
public abstract class ShipmentQuantity extends Shipment {
   public ShipmentQuantity() {
```

```
super();
@Override
public BigDecimal getValue(int y, int m, Date d, int type, LinkedHashMap<String, Object> map) {...96 行 }
```

Hanbell-KPI系统逻辑

```
public class ShipmentQuantityR1B1 extends ShipmentQuantity {
    public ShipmentQuantityR1B1() {
        super();
        queryParams.put("facno", "C");
        queryParams.put("deptno", " '1B000' ");
        //queryParams.put("decode", "1");
        queryParams.put("n_code_DA", " = 'R' ");
        queryParams.put("n_code_CD", " = 'HD' ");
        queryParams.put("n_code_DC", " ='R' ");
        queryParams.put("n_code_DD", " = '00' ");
IndicatorDetail a = entity.getActualIndicator();
```

```
if ((entity != null) && (entity.getSeq() == y) && (entity.getActualInterface() != null) && (!"".equals(entity.getActualInterface()))) {
   try {
        actualInterface = (Actual) Class.forName(entity.getActualInterface()).newInstance();
        uy = actualInterface.getUpdateYear(y, m);
        um = actualInterface.getUpdateMonth(y, m);
        actualInterface.setEJB(entity.getActualEJB());
        BigDecimal na = actualInterface.getValue(uy, um, d, type, actualInterface.getQueryParams());
        Method setMethod = a.getClass().getDeclaredMethod("set" + this.getIndicatorColumn("N", um).toUpperCase(), BigDecimal.class);
        setMethod.invoke(a, na);
        indicatorDetailBean.update(a);
   } catch (Exception ex) {
        Logger.getLogger(IndicatorBean.class.getName()).log(Level.SEVERE, null, ex);
```
